Tuesday, June 19th.

Second Baptist Sunday-School Pic-Nic.

"Much has been said on the subject of the treatment of appendicitis, principally with reference to the question whether, in a given case, an operation must be performed to save the life of the patient," says an eminent physician and surgeon who has recently been in Germany for the purpose of studying this disease. "It would doubtless be a great boon if a remedy could be found to make an operation unnecessary," continued the doctor. "Such a remedy, it is alleged, has been found under the name of 'collangol." Collangel, it is alleged, has been found under the name of 'collangol." Collangel water, which is of recent discovery. The antisoptic property of silver has long been known. Based upon this knowledge, successful experiments have been made by some noted German physicians through the use of the soluble. The treatment, according to his statement, has yielded extraordinarily good results after three days. Excepting two very severe cases out of seventy-two which came under his observation, all were cured without any surgical operation. It is claimed that this treatment is very much superior to any other; "and I am satisfied," says the physician, "in stating that every case of appendicitis, if early diagnosed, be it ever so acute and malignant, can be cured with collango without resorting to the knife,"—Har-per's Weekly.
